

Business Manager In-Orbit Manufacturing

About the role

At Starflight Dynamics, we harness the unique qualities of the space environment to revolutionize the process industries. Our cutting-edge technology enables the production of materials and substances that are unattainable on Earth, along with providing an integrated service from conception to delivery. We are on the lookout for a dynamic Business Manager to spearhead the development and market introduction of our in-space production infrastructure.

Key Responsibilities and Duties

- **Market Insight:** Keep a pulse on current and forthcoming in-space manufacturing technologies.
- **User Discovery:** Navigate through various industry verticals to pinpoint potential users and applications, gather essential requirements, and ensure customer perspectives shape our platform design.
- **Marketing Leadership:** Drive the promotion of our in-space capacities.
- **Business Development:** Scout for market opportunities, conceptualize projects, and advocate for them through compelling proposals.

Essential Skills & Qualifications

- A solid technical foundation in bio-science, life sciences, pharmaceuticals, or material science.
- A degree in a technical discipline complemented by a business education.
- Self-starter, with a strong level of initiative
- Proficiency in English, with exceptional writing and verbal communication skills.

Preferred Skills

- Experience in manufacturing, ideally within the space industry.
- A proactive and hands-on approach to challenges.

Position Type & Location

This position is open to local candidates in Munich, Germany, as well as remote applicants.
